AKASH PARMAR

FORWARD DEPLOYED ENGINEER | PRODUCT ENGINEER | FULL-STACK DEVELOPER

India • +91 8441816561 • akashparmar6561@gmail.com
Portfolio: akash-codes.in • LinkedIn: akash.linkedin.in

SUMMARY

Product-focused software engineer with experience shipping web applications and business workflows across trading, rewards, ecommerce, and operational platforms. Combines hands-on frontend/full-stack implementation with product architecture, stakeholder communication, and technical ownership. Experienced translating requirements into production features, dashboards, integrations, and internal tools using Next.js, React, TypeScript, Node.js, and MongoDB. Brings a practical, customer-oriented approach to problem discovery, rapid implementation, and iterative delivery.

CORE TECHNICAL SKILLS

Engineering: JavaScript, TypeScript, React, Next.js, Vue.js, Nuxt 2/3, Node.js, REST APIs
Product & UI: Requirements discovery, rapid prototyping, responsive UI, design systems, Figma, Tailwind CSS, shadcn/ui
Data & integrations: MongoDB, Mongoose, SQL fundamentals, API integrations, webhooks, background jobs, authentication flows
Delivery & tools: Vercel, Git, GitHub, Cloudinary, Amazon S3, Cursor, Claude, ChatGPT, Gemini, Antigravity
Additional: Three.js, React Three Fiber, WebGL, React Native/Expo, SQLite (project work)

SELECTED PRODUCT EXPERIENCE

TRADZU / *Trading rewards platform & marketplace*

- Helped shape a rewards ecosystem connecting trader-facing product experiences, purchase verification, reward allocation, and marketplace redemption.
- Worked on TZU Credits and ledger-oriented reward workflows, emphasizing traceability, administrative verification, and consistent business rules.
- Built product experiences spanning dashboards, reward balances, firm discovery, redemption flows, and administrative operations.
- Collaborated on reward calculations, currency normalization, and workflow integrity as interconnected product and engineering concerns.

Analytics snapshot: Active users: **10K** • New users: **10K** • Avg. engagement / active user: **3m 23s** • Event count: **282K**

MYFOREXFIRMS / *Prop trading discovery, analytics & trust platform*

- Led product engineering and technical direction for a platform focused on prop-firm discovery, comparisons, reviews, trust signals, and trader tooling.
- Worked on core application experiences including firm listings, review workflows, trader dashboards, structured content, and the Performance Trust Index concept.
- Coordinated frontend delivery with backend and SEO specialists, connecting product architecture with organic discovery and user-facing trust features.

Analytics snapshot: New users: **21K** • Active users: **21K** • Avg. engagement / active user: **2m 41s** • Views: **71K**

NEXETRO / *Coming soon · Trading technology platform*

- In development/planning. Product direction has explored simulated trading and evaluation-account workflows, risk-aware execution concepts, and a modular architecture.
- Implementation details and launch metrics will be added when the product is ready to be publicly represented.

PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER / *Sep 2025 – Sep 2026*

Duple IT Solutions Pvt. Ltd. | Mohali, India

- Built and maintained web application features using Next.js, TypeScript, and Tailwind CSS.
- Translated product requirements into responsive interfaces and reusable components, collaborating through implementation, debugging, and delivery.

- Used AI-assisted development tools including Cursor and Antigravity to accelerate coding and iteration while retaining responsibility for implementation quality.

UI DEVELOPER / *Jan 2024 – May 2025*
EvoMorf | Mohali, India

- Delivered responsive product interfaces for EFYS (Eat From Your Seat) and WalkBuy, translating requirements into production UI.
- Built reusable components in Nuxt 2/3 for EFYS Web and developed WalkBuy's React UI using a Figma-driven design system.
- Customized and delivered a CRM using a Next.js template within approximately six weeks, covering setup, customization, and frontend delivery.
- Handled client communication, estimation, deadlines, and day-to-day frontend execution.

CYBER SECURITY INTERN / *Apr 2023 – Aug 2023*
Accenture in India | Remote

- Supported end-user system maintenance and applied cybersecurity best practices.
- Developed a foundation in troubleshooting, teamwork, and security-aware technology operations.

ADDITIONAL PROJECTS

KTech Store: Built and deployed an ecommerce MVP for a retail client, including product CRUD, order administration, spreadsheet-based product import, homepage content controls, a basic dashboard, and transactional email workflows.

Nestingo: Worked on a student-accommodation platform spanning property discovery, inquiry and visit scheduling, lead follow-ups, property inventory, and administrative operations.

PIINTrack: Worked on a logistics/driver-tracking mobile app, exploring React Native/Expo, offline-first persistence with SQLite, queued operations, background GPS, and map integrations.

Folio 2026: Built an interactive developer portfolio with draggable windows, IDE-style navigation, WebGL effects, GitHub data integration, and reusable case-study rendering.

EDUCATION & ACHIEVEMENTS

B.Tech, Computer Science Engineering — CGC University Mohali, 2019–2023 | CGPA: 8.34

- First Prize, WebCrumbs.org AI-Powered Design Generation Competition.
- Hacktoberfest 2024: four approved open-source pull requests, including contributions to Tolgee and WebCrumbs.
